

LetUsPray - Master Prayer Journey System Plan

Mission

Design and implement a scalable Prayer Journey system that allows LetUsPray to grow into hundreds of organized prayer journeys without future architecture changes.

Strict Rules

- Do not audit the repository.
- Do not redesign unrelated features.
- Do not modify completed prayer content.
- Do not modify Psalms or Proverbs data.
- Do not create backup or temporary files.
- Follow existing SwiftUI architecture.
- Reuse existing models whenever possible.
- Modify only files required for this feature.

Objective

Implement support for organizing prayer journeys into collections. A collection is not a prayer; it contains multiple prayer journeys.

Initial Collections

Scripture

- Proverbs
- Psalms
- Song of Songs
- Prayers of Jesus
- Lord's Prayer
- Biblical Prayers
- Prayer Through the Gospels

Family & Relationships

- Pray for Your Family
- Pray for Your Marriage
- Pray for Your Children
- Pray for Your Parents
- Pray for Friendships

Church

- Pray for Your Pastor
- Pray for Church Leaders
- Pray for Your Church
- Pray for Unity

Missions

- Pray for Missions
- Pray for Missionaries
- Pray for Evangelism
- Pray for the Nations
- Pray for Your Community

Healing

- Healing
- Anxiety
- Depression
- Emotional Healing
- Forgiveness
- Freedom

Christian Living

- Wisdom
- Faith
- Hope
- Joy
- Happiness
- Peace
- Strength
- Courage
- Patience
- Gratitude
- Humility

Life

- Students
- Career
- Government
- Teachers
- Medical Workers
- Military
- First Responders

Seasonal

- Advent
- Lent
- Easter
- Christmas

Devotionals

- 30 Days in Proverbs
- 31 Days in Psalms
- 21 Days of Gratitude
- Names of God
- Wisdom for Men
- Wisdom for Women

Personal

- Prayer Journal
- Prayer Calendar
- Answered Prayers
- Personal Notes
- Shared Prayers

Prayer Journey Data Model

Each journey supports:

- Stable ID
- Title
- Subtitle
- Description
- Category
- Collection
- Hero Image
- Accent Color
- Estimated Duration
- Estimated Prayer Time
- Difficulty
- Number of Sessions
- Completion Status
- Progress
- Featured Flag
- Recommended Flag
- Seasonal Flag
- Premium-ready Flag
- Sort Order

Collection Experience

Each collection should provide:

- Beautiful header
- Description
- Journey count
- Featured journey
- Smooth navigation

Future Ready

Adding future journeys (for example Addiction, Marriage Restoration, Financial Wisdom, College Students, New Parents) should require adding data only, with no UI rewrite.

Do Not

Do not generate prayer content.

Do not write devotional text.

Do not populate journeys.

Build only the architecture, models, collection system, and navigation.

Verification

- Build successfully
- Launch successfully
- Navigate every collection
- Verify scalability
- Run git diff --check

Completion

Output:

- Files modified
- Architecture changes
- New models
- Collection system
- Navigation changes
- Verification results

If successful write exactly:

MASTER PRAYER JOURNEY SYSTEM READY FOR QA
